

Joseph Newman

I'm a full-stack developer with a background in UI/UX and graphic design. I focus on building responsive, user-friendly web apps with React on the front end and Node.js (express) or Java (Spring Boot) on the back end. I like working on projects from start to finish: designing clean interfaces, writing solid code, and making sure everything works smoothly together. I care about both how things look and how they perform.

PROJECTS

Art Portfolio CMS react • node.js • firebase

View live website at joseph-newman.com

Art Portfolio CMS is a custom built content management app I made with React and Firebase (Realtime Database & Storage). It allows artists to build and manage their own portfolio website without writing code. Users can log into a secure dashboard to update the site's name, hero image, about page, and create/edit art posts with images and descriptions.

Techsavvy Business Website custom wordpress theme • PHP

View live website at joseph-newman.com

I developed a custom WordPress theme for Techsavvy using HTML, CSS, Bootstrap, and PHP. I also created the company's branding and logo design. The theme was built from scratch to match the brand identity and included responsive layouts, editable content areas, and optimized performance across devices.

Techsavvy Hub App react native • node.js • express.js

View live app at joseph-newman.com

Designed and developed the Techsavvy Hub mobile app using React Native, Node.js, and Express.js, enabling clients to submit IT support tickets directly from iOS devices. Built a custom REST API to connect the app with our internal ticketing system, improving support efficiency.

EXPERIENCE

Techsavvy • IT Technician

October 2023 – Present

Diagnosed and resolved technical issues for schools and businesses at Techsavvy, gaining hands-on experience with backend systems, security software, and client-facing tools.

Idea Peddler • Multimedia Designer

January 2023 – October 2023

Multimedia Designer at Ideapeddler, a creative agency, crafting captivating digital experiences, collaborating with clients and teams.

Monkee-Boy Web Design inc. • Brand / Web Designer

October 2020 – November 2022

UI/UX designer, working in along side engineers on web/mobile based applications. Providing wireframes and mockups for development and ensuring designs are AA compliant with accessibility standards.
